

CFP AlarmSense 2 Zone Two-Wire Fire Alarm Panel

Part No. CFP702-2

Overview

LPCB certified to EN54-2/4, C-TEC's CFP two-wire 2 zone AlarmSensefire panelis designed to work with Apollo's AlarmSenserange of detectors, call points, sounders and visual indicators.

Most conventional fire systems work with two pairs of wires per zone: one pair for detection devices; the other for alarm devices. By using different voltage bands for quiescent and alarm states, AlarmSense components can be connected to the same pair of supply wires. This reliable technology $takes \ all \ of \ the \ complexity \ out \ of \ fire \ system \ design, \ leading \ to \ quicker, \ more \ flexible \ installation and \ a \ 20-25\% \ reduction \ of \ labour \ over \ a$ standard four wire system.

The CFP702-2 includes two AlarmSensezones, four conventional sounder circuits, class change & alert inputsandon-board fire & fault relays. A wide range of engineering functions are also provided including selectable zone delays, coincidence and non-latching zone facilities.

More Information

Third-party certified to EN54 parts 2 and 4 by the Loss Prevention Certification Board (LPCB).

Intuitive user-friendly interface with colour-coded buttons and combined keypad/keyswitch entry.

Manufactured by C-TEC in the UK.

Two AlarmSensezone circuits - compatible with Apollo's AlarmSense detectors, call points, sounders and visual indicators.

Four conventional sounder circuits.

Integral 1.5A EN54-4/A2 compliant switch mode PSU.

Wide range of engineering functions including zone test, coincidence, zone delay and non-latching zones.

Two on-board relays (Fire and Fault).

Two open-collector outputs (Remote and Reset).

'Class change' and alert inputs.

Installer-friendly design.

Attractive flush or surface mountable plastic lid and enclosure - no bezel required.

Low 25mA quiescent current.

Multiple indicators.

F 01942 829867

E sales@c-tec.co.uk

W www.c-tec.com

System expansion connections provided for up to eight two-wire repeaters (one CFP761 network card required per system).

Space for two x 12V 3.3Ah VRLA batteries.

Technical Specifications

Certified to EN54-2/4 by the LPCB (0832-CPR-F0386). Approvals/certifications

230V 50/60Hz. Mains supply Mains rated current 350mA maximum.

19V-28.5V (27V nominal). Ripple 7V maximum (battery fault). Internal power supply

Total output current limited to 1.5A @ 230Vac (ImaxA eq 146mA).

25mA (mains failed, internal sounder active, PSU & gen fault LED lit). Quiescent current

27V max, 20V min (final battery voltage) Alarm voltage

Max battery size and type 2 x 12V 3.2Ah VRLA connected in series. Min. battery size 1.2Ah.

No of detector zone circuits The CFP702-2 has 2 AlarmSense zone circuits which are compatible with Apollo's AlarmSense range

of detectors & call points AND sounders & visual indicators. (Max. length per circuit is 500m).

Call point resistor value Only use AlarmSense call points.

Max. devices per detector zone 25 AlarmSense detectors/manual call points per AlarmSense zone. For AlarmSense sounder

limitations per AlarmSense zone see 'Max. sounder output current' section.

4 - these are additional conventional (non-AlarmSense) sounder circuits; Max. length per circuit is No. of conventional sounder circuits

EOL resistor value 6800? 5% Tol. 0/25W (blue, grey, red, gold).

Max. sounder output current Each AlarmSense zone circuit & each conventional sounder circuit will support a max. sounder

current of 200mA. Distribute sounder loads as evenly as possible. Total sounder loading per panel

should not exceed 1.25A

Two: (1) Aux. Fire; (2) Fault. Volt free single pole changeover. Max. switch current 1A; Max. switch Auxiliary relays

Two: (1) Reset (Active during reset cycle); (2) Remote (Active during any unsilenced fire condition Open collector outputs

provided all relevant delays have expired). Max. sink current 30mA, Max. open circuit voltage 27Vdc)

24V Aux. Power (Protected by a resettable fuse. 100mA min. hold current. Resets when fault Other outputs

removed)

Two: (1) 'Class Change' (constant sounders); (2) Alert (pulsed sounders). Connect to OV to trigger, Auxiliary inputs

Max. input voltage 27V (non-latching)

Engineer (AL3) functions Program coincidence (double knock); Invoke One Man Walk Test; Program delays; Set up zones

for non-latching operation; Program sounders to resound (or not resound) when a new zone enters

alarm: Enter fault diagnostic facilities

Yes - for optional network driver cards (one required per repeater system), relay output cards and Expansion connections

EN54-13 sounder circuit interface boards.

380 W x 235 H x D 96mm. Product dimensions (mm)

Construction & finish Plastic lid and base; RAL7035 textured

IP30 IP Rating

1.75kg (without batteries). Weight
