150-150ST100-100 | *Flat Lid Trunking Tapered Reducer*

Electrix® Flat Lid Trunking Tapered Reducers, in 304 - V2A - 1.4301 stainless steel, are used to change the dimensions of trunking throughout an installation.

Fewer coupling screws are required due to our factory fitted couplings, making the installation easier to install and easier to clean.

This satin (brushed) finish tapered reducer increases/decreases the size of our Flat Lid Trunking from 150 x 150 to 100 x 100 (W x H mm).

Our unique system features a cover plate over each lid joint which reduces the ingress of foreign matter.

UL Listed.

SPECIFICATIONS	
Material Information	
Material Type	Stainless Steel
Material Grade	304 - V2A - 1.4301
Material Finish	Satin (Brushed)
Material Thickness (mm)	1.2
Dimensions	
Size (W x H mm)	150 x 150 to 100 x 100
Custom Design	Custom Designs available on request.
